Job Description

Role

NetGaming is an upcoming casino content provider. We offer beautifully crafted games across all channels. We are expanding in key regulated markets and adding new product variants to our portfolio.

We are looking for a passionate, technically skilled and driven game developer to join us in delivering high quality content. You will be tasked with back-end game development.

Job Title	Software Engineer
Department	Technical
Detailed Work Profile	1. Should be able to code the game logic. 2. Should be able to review the code with maximum possible scenarios. 3. Should be able to deploy the code on live/production servers. 4. Should do backend application testing (before QA testing commences). 5. Should be able to interact with internal and external customers to understand the requirements. 6. Candidate **must** have relevant casino slot game engine development experience. Technologies: PHP, MySQL, Redis, Ubuntu
Experience required	3 to 4 years
No of candidates	2
Education qualification	Graduation or post-graduation in Computer Science or IT related
Personal Attributes	The candidate must be dedicated, honest, team player, humble and diligent. We are a small team with no time for micromanagement. We want the candidate to take initiative and complete tasks.
Communication Skills	Above average (they should be able to gather technical requirements from internal and external customers).
Languages Known	English, any other language is an added advantage.
Key Competencies (Knowledge, Skills, Attitude & Behaviour)	We want a candidate with an open mind and positive attitude towards work. We are extremely customer centric and do not say no to customers unless all options are explored. We don't want a naysayer in our team. Although we have heads of departments all of us work on everything, when it comes to work, there is no hierarchy, we do what is needed to get the job done.
