

Job Description

Role

NetGaming is an upcoming casino content provider. We offer beautifully crafted games across all channels. We are expanding in key regulated markets and adding new product variants to our portfolio.

We are looking for a passionate, talented, and driven game producer to join us in delivering high quality content. You will be tasked with co-ordinating all aspects of game production from inception to delivery.

Responsibilities

- Brainstorm game ideas and envisage player's journeys and best possible UX to ensure game flow is optimised.
- Work with studios and software engineers to drive on-time delivery of high-quality slots and other casino content.
- Ensure game assets are requested from the studios. Create game flows from a player perspective to foresee game asset requirements, these include animations, feature specific assets and sounds.
- Suggest front-end solutions to the client team to effectively convey the game idea. Help the client team to optimise gaming experience by highlighting anticipating moments in a slot by way of visuals and sounds
- Develop, track and report on project progress, resource, staff, assets, schedules, and project metrics.
- Working with stakeholders to clarify requirements where not clear.
- Participate in game reviews, UATs and provide feedback.
- Participate in removing project barriers and roadblocks.
- Identify and communicate project risks and instigate contingency plans.
- Work on multiple projects in tandem.

Key skills to include

- Bachelor's degree or equivalent experience.
- 2+ Years of experience managing the production of online and mobile games.
- Track record of successful delivery of quality product through consistent milestones.
- Strong Excel, JIRA, and PowerPoint skills.
- Knowledge of gambling industry, especially casino content.
- Knowledge of HTML5 technologies.
- Experience with agile methodologies.
- Interest in working with distributed teams across multiple cultures, time zones, and communication styles.
